MONTHLY DIGEST OF STATISTICS

No. 293

MAY 1970

1. This *Digest* has been prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments.

2. The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

3. The figures in the *Digest* are mainly totals for calendar months or monthly averages.

4. Some of the figures included in this *Digest* are provisional only and may be revised in later issues.

Definitions

5. A *Supplement of Definitions and Explanatory Notes*, published with the January issue, gives detailed definitions of all the terms and units used in the *Digest*.

6. The following general definitions should be noted in using the *Digest*:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Units of measurement.

Ton = long ton of 2,240 lb.

Gallon = imperial gallon.

Consumption and stocks. The terms 'consumption', 'disposals' and 'stocks' are normally defined in detail in the *Supplement to the Digest*. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

External trade. Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

Symbols and conventions used

7. *Symbols.* The following symbols are used throughout:

.. not available.

— nil or less than half the final digit shown.

* average (or total) of five weeks.

8. *Change of basis.* A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

9. *Rounding of figures.* In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Revisions and changes in content

10. This issue includes the annual statement on Public expenditure on social services and housing (pages 4-9), Tables A-D.

Table E. 'The estimated future total population of the United Kingdom' (pages 10 and 11) supersedes the estimates given in Table 13A of the April 1969 issue. The assumptions on which this projection has been prepared are given on page 10.

11. Changes have been made in the following tables:

Table 15. *Employees in employment: All industries.*

Table 16. *Employees in employment: Index of production industries.*

The analysis by industry is now based on the Standard Industrial Classification 1968 from July 1969 in these tables.

Table 49. *Output per head.*

Table 50. *Total home costs and labour costs per unit of output.*

These tables have been expanded to include additional industries.

Table 74. *Copper and zinc.*

Table 75. *Lead, tin and aluminium.*

These tables now show figures of non-ferrous metals in metric tons.

Table 95. *Hosiery.*

'Women's tights and pantie-hose' are now included in this table.

Central Statistical Office,
Great George Street, S.W.1.

Temperature, rainfall and sunshine	167	154
Alphabetical index		155

Public expenditure on social services and housing

The following tables give figures of public expenditure on social services and housing for the financial years 1961/62 to 1969/70. Figures for the latest two years are the most recent estimates available and subject to revision. The tables cover both current and capital expenditure of the central government (including the National Insurance Funds) and local authorities, and the capital expenditure of public corporations. Transfers from one part of the public sector to another have been eliminated to avoid double counting. The figures relate to years ended 31 March except for expenditure of local authorities in Scotland, most of whose financial years end during May.

Functional classification

The definitions used follow closely those in Table 50 of *National Income and Expenditure* 1969. As in the Blue Book expenditure on administration includes the cost of common services (i.e. accommodation, stationery and printing, super-annuation, etc.) which is not borne by the departments administering each service. The following notes give brief descriptions of some of the functional headings in the tables.

Education: This covers expenditure by the Education Departments, local education authorities and the University Grants Committee on education in schools, training colleges, technical institutions and universities.

National health service: This covers expenditure by hospital authorities, executive councils and Health Departments on hospital, general medical and other health and welfare services; and expenditure by local authorities on the provision of health centres, health visiting, home nursing, the care of mothers and young children, ambulance services, vaccination and immunisation, etc. Only the net costs of providing these services are included in total public expenditure, receipts from patients being shown separately in Table B.

Child care: This covers the contributions made towards the cost of running voluntary approved schools, remand homes and other children's homes; and expenditure on similar establishments directly administered by local authorities.

School meals, milk and welfare foods: This covers the cost of providing school meals, milk and welfare foods at reduced prices to children and expectant mothers. Only the net costs of providing these services are included in total public expenditure, payments by the recipients of the services being shown separately in Tables B and C.

Social security benefits: Non-contributory old age pensions and national assistance ceased after 26 November 1966, when they were replaced by supplementary benefits. The analysis by type of supplementary benefits is not exact. The estimates are derived from average numbers in receipt of benefit and average amounts paid. Expenditure on administration under Supplementary benefits includes the administration of non-contributory old age pensions, and expenditure on reception centres and hostels.

Housing: This covers subsidies paid by the Housing Departments towards the provision of housing by local authorities, development corporations and housing associations; the net expenditure by local authorities on housing after deducting rents and central government subsidies; capital expenditure by the public sector on the provision of houses for letting; grants by local authorities towards the cost of conversions and improvements of privately-owned houses; and net lending by the public sector for private house purchase.

Economic classification

The definitions used follow those in the *National Income and Expenditure* Blue Book. The following notes are intended as a general guide to the methods adopted.

Current expenditure on goods and services: This comprises purchases of those goods which are not regarded as fixed assets, payments for the services of public authority employees and payments for other services. Imputed rents for the use of assets owned and used by public authorities are also included; these relate mainly to schools and hospitals and are measured by reference to the rateable value of these buildings. The figures have now been increased by the inclusion of net expenditure on school meals, milk and welfare foods, formerly classified as grants to persons.

Subsidies: These are payments to trading bodies which have the effect of reducing selling prices below the factor costs of production. Since the provision of housing by local authorities is regarded as a trading activity, both the rate contribution to meet the deficit on local authority housing and central government grants to local authorities, housing corporations, etc. for housing are treated as subsidies.

Current grants to private bodies: These are grants towards the current expenditure of universities, colleges, and other private non-profit making bodies.

Current grants to persons: These consist of scholarships, students' maintenance and training allowances, allowances to patients in hospitals and social security benefits.

Current grants paid abroad: These comprise subscriptions to the United Nations Educational, Scientific and Cultural Organisation and the World Health Organisation; and payments of national insurance benefits and war pensions to persons living overseas.

Gross fixed capital formation: This includes both expenditure on new assets and the purchase (less sales) of land and existing buildings. It relates mainly to buildings but expenditure on capital equipment in hospitals, for example, is also included.

Capital grants to private bodies: These grants are towards expenditure on fixed assets by universities and other private non-profit making bodies.

Capital grants to persons: These comprise mainly compensation payments to doctors for the loss of right to sell medical practices, and grants by local authorities towards the cost of conversions and improvements to privately-owned dwellings. From 1967/68 they include grants to doctors for improvements to surgeries.

Net lending to the private sector: This comprises loans (less repayments) to aided and special agreement schools, universities and other private non-profit making educational bodies; to general practitioners' group practices; and to building societies, housing associations, housing societies and persons for house purchase.

⁽¹⁾ This item relates to Northern Ireland only.⁽²⁾ Including from 1967/68 improvement grants to general practitioners (£0.1m in 1967/68).⁽³⁾ From 1966/67 local authority capital expenditure on school canteens is included with Education.

Estimated future total population of the United Kingdom

Table E: This table is included for this issue only and supersedes the estimates given in Table 13A of the April 1969 issue. The projection has been prepared on the basis of the following assumptions:

Mortality: Death rates at the outset are based on recent experience. At ages under 40 for males and under 50 for females death rates are assumed to decline over the period of the projection until, after forty years, they are one-half or less of present rates. Above these ages the assumed rates of decline become progressively smaller as the age advances until they vanish at ages over 90. At almost all ages the assumed rates of decline are smaller for males than for females.

Births: The estimates assume 916,000 live births in the year mid-1969 to mid-1970 and a gradual increase thereafter to 993,000 births in 1976, to 1,020,000 in 1981, to 1,121,000 in 1991 and to 1,165,000 in 2001. The ratio of male to female births has been taken as 1.06 for Great Britain and 1.07 for Northern Ireland.

Migration: A net outward migration of 30,000 a year has been assumed for all future years.

The births now assumed are lower than those assumed in the corresponding Table 13A in the April 1969 *Monthly Digest*. In 1969, for the fifth successive year, births were fewer than in the previous year. The downward trend had paused during 1968 but was renewed during 1969 and there is no evidence yet that it has come to an end. There is, however, no evidence as yet of a fall in average completed family size for a given age at marriage except at the youngest ages. Allowance has therefore been made for a continuance of this fall in family size for marriages under the age of 20, but constant average family sizes have been assumed for other ages at marriage. The net result of these assumptions and those relating to the age-distribution of marriages is to produce an approximately constant average family size of a little less than $2\frac{1}{2}$ for marriages in all future years.

Last year's projection allowed for a net outward migration of 20,000 a year. On this occasion, it has been assumed that there will be a net outward balance of 30,000 a year throughout. Despite this, the effect of migration is to add to the numbers of births assumed, because allowance has been made for the younger average age of immigrants as compared with emigrants and because the fertility of immigrants is on average somewhat higher.

Estimated future total population of the United Kingdom

Local government service	802 ⁽⁵⁾	752	754	758	789	788	825	818	817	820

⁽¹⁾ The figures for June 1964(a) and the corresponding figures for earlier months are not strictly comparable with those for June 1964(b) and later months which, for Great Britain, are on the revised basis of calculation (see pages 110-112 of the March 1966 issue of the *Ministry of Labour Gazette*.)

⁽²⁾ Between June 1966 and June 1967 the industrial classifications of many establishments in Great Britain were corrected. The estimates for June 1967 take account of these reclassifications and the figures for individual industries are therefore not comparable with those published for previous mid-years. Two sets of estimates are given for June 1966 i.e. (a) excluding the effects of reclassifications (for comparison with earlier estimates) and (b) including the effects of reclassifications (for comparison with subsequent estimates).

⁽³⁾ Estimates for June 1969(a) are classified according to the Standard Industrial Classification (1958) and are not fully comparable therefore with the estimates for June 1969(b) which are classified on the basis of the Standard Industrial Classification (1968).

⁽⁴⁾ The industries included in the index of production are Orders II-XVIII of the Standard Industrial Classification (1958) and Orders II-XXI of the Standard Industrial Classification (1968).

⁽⁵⁾ Owing to reclassification, figures for 1963 are not strictly comparable with those from 1964 onwards. See page 59 of the February 1965 issue of the *Ministry of Labour Gazette*.

⁽¹⁾ Figures after June 1969 are provisional being subject to revision after the count of national insurance cards at mid- 1970.

⁽²⁾ See footnote ⁽²⁾ to Table 15.

⁽³⁾ The Order Groups of the Standard Industrial Classification are presented in the format of the Standard Industrial Classification 1968. However, estimates for June 1969 (a) and earlier months are classified according to the Standard Industrial Classification (1958) and are not fully comparable therefore with the estimates for June 1969 (b) and later months which are classified on the basis of the Standard Industrial Classification (1968). The Industries included in the Index of Production are Orders II–XVIII of the Standard Industrial Classification (1958) and Orders II–XXI of the Standard Industrial Classification (1968).

	Apr. 1											

(1) Established and unestablished staff, excluding employees of the Northern Ireland Government. In arriving at the totals two part-time workers are counted as one whole-time worker.

(2) Including the Department for National Savings (15,300) and the Ministry of Posts and Telecommunications (355) from 1 October 1969.

(3) Casual or seasonal staff recruited for periods normally of less than six months. These are included in the total and other columns.

(4) Became a public corporation on 1 October 1969.

(5) Ministry of Social Security before November 1968.

(6) Ministry of Labour up to May 1968.

(7) Ministry of Aviation up to January 1967. In February 1967 the functions of the Ministry of Aviation were taken over mainly by the Ministry of Technology (which was formed in October 1964).

(8) In July 1966 certain staff of the Ministry of Aviation were transferred to the Board of Trade.

(9) Including the Ministry of Technology up to January 1967, and Ministry of Health up to October 1968.

Note: Figures after June 1969 are provisional and may be revised after the final figures for the mid-1970 count of national insurance cards become available.

Source: Department of Employment and Productivity

⁽¹⁾ Orders III-XVI of the Standard Industrial Classification (1958) and orders II-XXI of the Standard Industrial Classification (1968).

⁽²⁾ Figures relate to establishments with more than 10 employees in all manufacturing industries except shipbuilding and ship repairing. ⁽³⁾ Excluding maintenance staff.

⁽⁴⁾ Figures from July 1968 have been revised to take account of the information obtained from the results of the mid-1969 count of national insurance cards and have also been revised from June 1969 to take account of the assumption that operatives stood off by an employer for the whole week have been on short-time for 40 hours (formerly 42 hours) each.

(1) Including ex-service men and women and other registered unemployed persons aged 18 years and over not classified to an industry. Registered unemployed school-leavers (i.e. persons under 18 not in full-time education who have not yet taken up employment) are excluded.

(2) Based on the January to May figures (1958 S.I.C.) and the June to December figures (1968 S.I.C.).

(3) The figures from June 1969 onwards have been compiled using the 1968 edition of the Standard Industrial Classification. This change slightly affected the numbers unemployed in some industries so that figures since June 1969 may not be strictly comparable with those for earlier periods.

(4) The method of seasonal adjustment has been revised and details of this are given in the April issue of the *Employment & Productivity Gazette*. Revised seasonally adjusted figures for industry groups will be published as soon as possible.

(1) Stoppages involving fewer than 10 workpeople or lasting less than one day have been omitted except any in which the total number of working days lost exceeded 100. The figures for 1969 are provisional.

(2) From January 1970 the analysis by industries is based on the *Standard Industrial Classification 1968*. Figures prior to that date are based on the *Standard Industrial Classification 1958*.

(3) Where stoppages extend over more than one month, the workers involved are counted in the month in which they first participated.

(4) The figures of working days lost relate to the total working days lost within each of the periods shown as a result of stoppages in progress in that period, whether the stoppages began in that period or earlier.

(1) Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each month.

(2) Including prescribed industrial disease.

(3) Yearly figures are averages of twelve monthly figures.

(4) These figures include substantial numbers of persons who have been sick for a long time and who may no longer be in employment.

(5) Yearly figures are averages of quarterly figures. Quarterly figures relate to first Monday in February, May and November and last Monday in July.

(6) Including a diminishing number of widows with pensions of 30s. a week derived from the old Contributory Pensions Acts.

(7) Including the elder or eldest child for whom no allowance is payable.

(8) Average of twelve months March 1966 to February 1967.

(9) The estimates shown for January 1970 for administrative reasons have not been based on 'claim papers in action'

*Average of five weeks.

⁽¹⁾ Pension age means 65 years for men and 60 years for women.

⁽²⁾ Some of the supplementary pensions provide for the requirements of a household with more than one pensioner.

⁽³⁾ Includes a small number of persons over pension age.

⁽⁴⁾ From November 1967, the method of compiling the statistics of the breakdown of the number of supplementary benefits has been revised.

Hardy nursery stock	34	34	14	16				
Bulbs			14	15				
Flowers (not under glass)			6	5				
Other crops	18	34	36	35	39	54	29 ⁽⁷⁾	
Bare fallow	262	229	199	414				
Lucerne⁽⁸⁾⁽⁹⁾	47	37	..	..	89	65	..	
Temporary grassland⁽¹⁰⁾	6,233	5,934	5,873 ⁽¹¹⁾	5,738 ⁽¹¹⁾				
For mowing ⁽⁹⁾	2,941	2,852	2,824	2,734	4,676 ⁽¹²⁾	4,705 ⁽¹²⁾	4,608 ⁽¹³⁾	4,573 ⁽¹³⁾
For grazing	3,292	3,082	3,049	3,004				
Permanent grassland: Total	12,199	12,328	12,195 ⁽¹⁴⁾	12,348				
For mowing ⁽⁹⁾	3,018	2,998	2,872	2,938	3,880	3,933	3,787	3,959
For grazing	9,181	9,330	9,323	9,410				
Rough grazings (including common rough grazings)⁽¹⁵⁾	17,718	17,639	17,537	17,568				

(¹) Excluding agricultural holdings of one acre or less in extent in Great Britain. In Northern Ireland excluding holdings of less than one acre. (²) Beans only. (³) Gross production figures are shown. (⁴) Includes some production diverted from green peas. (⁵) Weight in pod. (⁶) Shelled weight. (⁷) Excludes rape grown for oilseed in England and Wales. (⁸) England and Wales only. (⁹) Production figures relate to hay only. The production of hay in England and Wales is calculated from the area cut for hay and actually harvested and does not include the area mown for silage, drying or seed; the production of hay in Scotland and Northern Ireland is calculated from the area cut for hay only and does not include grass mown for silage or drying. (¹⁰) Clover and rotation grasses. (¹¹) Includes lucerne. (¹²) Includes hay from permanent grass in Scotland. (¹³) Includes hay from lucerne. (¹⁴) Excludes some 47,000 holdings in England and Wales which make a negligible contribution to agricultural output. This affects comparison with permanent grassland acreage figures in previous years. (¹⁵) Includes the total area of deer forest land in Scotland.

⁽¹⁾ Based on returns from Potato Marketing Board and Ministry of Agriculture, Northern Ireland.

⁽²⁾ As refined sugar.

⁽³⁾ Including quantities processed and fed to livestock under schemes for implementing the Agriculture Act, 1947, and seed sold for food.

⁽⁴⁾ Disposals (excluding seed and chats) of home grown and imported potatoes for human consumption, processing, export and sales for stockfeed through schemes for implementing the Agriculture Act, 1947. ⁽⁵⁾ Including sugar used in the manufacture of other foods.

⁽⁶⁾ Imported and home produced supplies of refined and raw sugar. Supplies held by the British Sugar Corporation and by refiners in the United Kingdom are included.

⁽⁷⁾ 53 week period (except for potatoes). *Five week period.

(¹) This index provides a general measure of monthly changes in total industrial production. The unadjusted index allows for variations in the length of calendar months so that it gives the average weekly rate of production in each month. The seasonally adjusted index allows for holidays and regularly recurring seasonal movements.

As some of the figures on which the index is based are available only with considerable delay, the index numbers for the last few months are always liable to be revised. Industries are grouped according to the *Standard Industrial Classification, 1968*.

(²) For an index of construction (new work only) for Great Britain, see Table 105. (³) Provisional.

(1) Mines operated by the National Coal Board which account for about 99 per cent of the total output. Changes in the basis of the recorded figures have occurred from time to time making comparisons difficult. The figures given in this table have therefore been adjusted where necessary to conform throughout to the current definitions given in the *Supplement of Definitions and Explanatory Notes*.

(2) Week ended 30 December 1967 is omitted from the figures.

* Average of five weeks.

(1) Excluding quantities used for production of steam for sale. In 1969, 252,000 tons of coal and 17,000 tons of oil were used for that purpose.

(2) Including generation by oil engine, refuse destructor, and waste heat.

(3) Including purchases from industrial producers whose generation is shown in Table 59, and net imports from France.

(4) Annual figures relate to the maximum load occurring near the end of the year or early in the following year.

(¹) Excluding the fuel industries which produced:

Source: Ministry of Technology

	<i>Million kilowatt hours</i>
Coal mines (1968/69)	613
Gas works (1968/69)	213
Mineral oil refining (1968)	871

These industries accounted for an average weekly production of about 33 million kilowatt hours in 1968 as compared with 327 million kilowatt hours produced weekly in 1968 by the industries included in the table.

(2) Electricity supplied by United Kingdom Atomic Energy Authority prototype reactors to the public electricity supply system.

* Average of five weeks.

Arrivals of tanker-borne crude petroleum and petroleum products⁽¹⁾

⁽¹⁾ Excluding natural gas.

Source: Ministry of Technology

⁽²⁾ From January 1968 agency pick-up sales are included under dealers, and not as previously under commercial consumers. These sales amounted to 5.4 thousand tons (5, 4 and 3 star) and 5.6 thousand tons (other) in January 1968.⁽³⁾ From January 1967, all finished motor spirit with an octane number (research method) not less than 94. The figures relate to Premier grades prior to January 1967.⁽⁴⁾ The figures relate to Standard grades prior to January 1967. ⁽⁵⁾ Provisional.Analysis of inland deliveries of gas/diesel and fuel oils⁽¹⁾

(1) The iron content of home produced iron ore is about 28 per cent and of imported iron ore about 60 per cent.

(2) Excluding consumption of refined and cylinder iron made otherwise than in blast furnaces.

(3) At steel works, steel foundries and blast furnaces.

(4) At steel works and steel foundries.

(5) Ingots, metal for continuously cast blooms, billets and slabs, and metal for castings.

(6) Stocks at producers' works of alloy and non-alloy ingots, semi-finished and finished steel in terms of ingot equivalent.

(7) Including imports (and material for manufacture of drop forgings) but excluding deliveries of all materials for intra-industry conversion.

(8) 53 week period. *Average of five weeks.

⁽¹⁾ Characteristic products of industries in Order VI of the *Standard Industrial Classification 1958*, except ordnance and small arms. Excluding deliveries by the smallest firms which are estimated to be about 2 per cent of the total. In general, spare parts supplied by manufacturers of complete machines are included with these machines, but parts, other than those separately specified, supplied for assembly by makers of complete machines are included in the heading for sub-contract sales and components.

(1) Includes naval vessels registered as merchant ships.

(2) Gross tonnage (100 cubic feet per g.t.) is the total volume of all the enclosed spaces of a vessel.

(3) The total tonnage specified on ordering vessels differs slightly from the total actual measured tonnage on completion.

(4) Vessels are shown for export if they are for other than U.K. registration.

(5) Modifications include alterations of 500 gross tons or more to the tonnage and the country of registration of vessels already on order.

(6) Modifications and cancellations exceed new orders for the period.

(¹) Wool, hosiery (and other knitted goods), made-up clothing and the spinning, weaving and merchant converting sections of the cotton and man-made fibre industries. (²) The index numbers for individual sectors relate to the total output of manufacturers whose main business is in that sector of the industry and not output of that particular type of garment. (³) These indices have been adjusted to allow for the differences in the lengths of calendar months but not for holidays or for other seasonal variations.

(¹) Fabrics in million square yards. From January 1967 the figures include non-wool fabrics woven in the wool textile industry. (²) All fibres (other than virgin wool) used in woollen spinning and felting, and hair used in the making of tops. (³) From January 1969 includes the small quantity of semi-worsted yarns which previously was divided between the woollen and worsted yarn headings. (⁴) Excluding stocks held by farmers. Annual figures are at 31 August.

⁽¹⁾ The figures relate to schemes mainly over 5,000 sq. ft. ⁽²⁾ For all projects (new buildings, extensions to existing premises and buildings converted to industrial use) for which industrial development certificates were issued. ⁽³⁾ These regions take in the places designated as Development areas under the Industrial Development Act, 1966: the aggregate figures for the Development areas are shown separately. ⁽⁴⁾ The area of industrial building has, since the introduction of the Industrial Development Act in August 1966, been extended to include all ancillary space for storage, canteens, etc. Prior to that date ancillary space was not counted, except in Scotland, Wales and the Northern region; the figures since that date on the old basis of measurement are estimates of the area which would have been approved under the pre-August 1966 definition. ⁽⁵⁾ For manufacturing industry only (new buildings and extensions to existing premises).

(1) Including the Commission for the New Towns and new town development corporations; in Scotland, the Scottish Special Housing Association and, in Northern Ireland, the Northern Ireland Housing Trust.

(2) Including housing associations, other than the Scottish Special Housing Association and the Northern Ireland Housing Trust, and houses provided or authorised by government departments for the families of police, prison staff, the armed forces and certain other services.

(3) Figures for England and Wales relate to the period April 1945 to December 1954.

(¹) Excluding building which is wholly financed from private sources. (²) From January 1960 for Scotland and from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. The value of such projects, shown separately for the years 1946 to 1959 in previous tables of educational building, has been included as appropriate under the headings 'Primary and secondary' and 'Special schools'. (³) Figures for England and Wales include the value of projects for which specific approval is not required. (⁴) Totals for England and Wales include the value of certain projects for which no analysis between type of project is available. As from October 1961, the individual value of such projects is less than £2,000. (⁵) Figures for England and Wales relate to project values and those for Scotland to contract values. Figures for Scotland include the cost of certain minor projects for which specific approval is not required. (⁶) The Scottish figures of projects approved refer to approval at the sketch plan stage, which might be some six to twelve months before the start of construction. (⁷) The Scottish figures of 'Under construction' and 'Completions' are based on the tender costs. The 'Under construction' and 'Completions' figures exclude the value of approved school projects which in 1969 amounted to £1,246,000 and £406,000 respectively.

(¹) The method of calculation of the number of new places provided differs in England and Wales and Scotland. In England and Wales the figures refer to the number of pupils for which new school accommodation is designed. In Scotland the figures refer to the sum of the approved capacities of all the teaching rooms whether classrooms or practical rooms, and will normally exceed the number of pupils for which accommodation is designed.

(²) Including new schools brought into partial use before completion.

(³) Extensions, alterations, remodelling and war damage repairs.

(¹) Including pedestrian controlled delivery vans. (²) Including trolleybuses, tramcars and some private hire cars. (³) Up to and including 1964, showmen's vehicles, tower wagons and local authorities' watering and cleansing vehicles are included. From 1965 onwards, tower wagons used for street lighting and local authorities' vehicles are included with vehicles exempt from duty. All the figures include both general and agricultural goods vehicles, general haulage tractors and showmen's tractors. (⁴) Licences current at any time during the September quarter. The figures for all years except 1966 are on a sample basis. (⁵) Quarterly estimates based on licence issues and refunds.

(¹) The railway figures are derived from statistics compiled by the British Railways Board and from 1969 include estimated ton mileage of freight carried by B.R.B. on behalf of Freightliners Ltd. and National Carriers Ltd. The annual figures for road transport are estimated from periodic sample enquiries, traffic count data, trends in the goods vehicle population and changes in industrial output. The monthly road transport figures are estimated from traffic count data.

(²) Not over 30 cwt. unladen weight.

(1) Passenger journey figures for 1969 are no longer strictly comparable with those for previous years, due to the transfer from British Railways to London Transport Railways of the Bow to Upminster line on 1 January 1969. This accounts for about 2½ million journeys per period.

(2) The four-weekly averages for each year are computed from calendar year totals.

(3) The three stages of the London Transport Victoria Line were opened to traffic on 1 September 1968, 1 December 1968 and 7 March 1969.

(4) The reduced fares category includes statutory day returns in the London area.

(1) Including net adjustment for recording of exports.

(2) Excluding deliveries of, but including payments for, U.S. military aircraft and missiles.

(3) Assets: increase —, decrease +. Liabilities: increase +, decrease —.

(4) The loss arising from the fact that the Exchange Equalisation Account's forward commitments entered into before devaluation have been recorded as being settled on maturity at the new parity.

(5) Includes changes in official holdings of non-convertible currencies.

(6) Excludes revaluation to sterling equivalent of official liabilities (+6) and U.K. banks' liabilities and claims of 610 at the time of devaluation.

(7) Consists of non-sterling countries and international organisations other than I.M.F. Excludes increases in sterling balances resulting from revaluation payments at the time of devaluation—liabilities to central banks denominated in sterling +119; liabilities to European Monetary Agreement +2.

(8) Excludes the revaluation in sterling terms at the time of devaluation in 1967: assets —131.

⁽¹⁾ The parity of sterling changed from £1 to \$2.80 to £1 to \$2.40 on 18 November 1967.⁽²⁾ The end-June 1969 figure includes 14 of British government securities not previously classified to this series. Hence the implied change in this quarter differs from that shown in Table 137 (continued). The implied changes may also differ from quarter to quarter since the area levels are rounded independently of the total.⁽³⁾ Including Rhodesia up to the end of 1965 and Burma up to the end of 1966.⁽⁴⁾ Including Rhodesia from the beginning of 1966 and Burma from the beginning of 1967.Sources: H.M. ⁽¹⁾ In addition to its lending, the National Loans Fund meets the interest and management charges of the national debt. To the extent that these charges are not matched by interest received on its own lending and by profits of the Issue Department of the Bank of England, the Consolidated Fund meets the difference. The surplus on the Consolidated Fund is paid to the Fund, leaving the difference between that and its net lending as the Fund's financing requirement. ⁽²⁾ Electricity Council, North of Scotland Hydro-Electric Board and South of Scotland Electricity Board. ⁽³⁾ British Overseas Airways Corporation, British European Airways Corporation and British Airports Authority. ⁽⁴⁾ Including loans to harbour authorities. ⁽⁵⁾ Loans under the Ship Credit Scheme and to the Shipbuilding Industry Board, housing associations and building societies. ⁽⁶⁾ Loans to Votes for U.S. military aircraft, married quarters for armed forces and Town and Country Planning compensation; and lending to Redundancy Fund, Land Commission and Northern Ireland Government. ⁽⁷⁾ Calculated on the new basis for purposes of comparison.

(¹) This is equal to Exchequer borrowing and special transactions (net) less receipts from extra-Exchequer funds, etc. It is also equal to the amount the central government borrows less any increase (or plus any decrease) in its holdings of gold and currency reserves.

(²) A negative item represents a surplus, a positive item a deficit.

(³) The cumulative monthly figures do not agree precisely with the quarterly figures because of adjustments, incorporated in the latter, for accrued interest on National Savings and for issued coin.

(⁴) Calculated on the new basis for purposes of comparison.

(⁵) Adjustment for redemption of government guaranteed stock.

(⁶) Including transfer of surplus of the death duties surrendered securities account.

(⁷) Including surrender of final balance on the local loans fund.

(⁸) Consolidated Fund liability for service of the National Debt; balance carried over until March.

(¹) Including some land tax, mineral rights duty, excess profits duty and special contribution, not included under separate headings; these amounted to approximately £0.2 million in each of the financial years 1965/66 and 1966/67. Including profits tax, excess profits tax and excess profits levy from April 1969. (²) Payments due in certain cases where the overseas rate exceeds the corporation tax rate (Section 84, Finance Act 1965). The figures relate to calendar months. (³) The yearly totals include revisions which cannot be allocated to particular monthly periods.

Customs and Excise duties

(⁵) The sum of the twelve monthly receipts under certain headings is slightly greater than the total shown for the financial year. This is because the monthly figures include duties ultimately payable to the Isle of Man and adjustments for these are made only at the end of the financial year. (⁶) Including receipts from the 10 per cent regulator on most Customs and Excise duties and on purchase tax, operative (i) from 21 July 1966 to 11 April 1967 and (ii) from 23 November 1968 to April 1969. (⁷) The figures given do not include receipts from Northern Ireland, as the duties apply only in Great Britain. Separate duties on betting have been imposed by the Government of Northern Ireland. (⁸) Including receipts from the temporary charge on imports from October 1964 to November 1966 less export rebates. (⁹) Includes arrears in respect of earlier years. (¹⁰) In September repayments began to be brought to account at an earlier stage. Without this change, this figure would have been -7.0. (¹¹) Provisional.

(1) Figures supplied by the Bank of England and rounded to the nearest £5 million.

(2) Total deposits less (i) balances with, and cheques in course of collection on, other banks in the United Kingdom and the Republic of Ireland and (ii) items in transit between offices of the same bank.

(3) Comprising (i) Coin, notes and balances with Bank of England, etc. (excluding special deposits), (ii) Money at call and short notice; (iii) Bills discounted, which include re-financeable export credits.

(4) Excluding items in transit.

(5) Excluding advances to nationalised industries (including, from 28 July 1967, the British Steel Corporation).

(6) Some changes have been made in the accounting procedures of the clearing banks. Changes in the treatment of transit items at mid-January 1970 are estimated to have reduced London clearing banks' gross deposits by about £350 million.

(7) From March 1970, inner reserves and sundry provisions were transferred from gross deposits: this affects both deposits and the ratios. Comparable figures for January and February 1970 are not yet available.

(1) Figures are not strictly comparable throughout owing to changes in the composition of the clearings. From 12 January 1968 provincial clearings, with the exception of the afternoon clearing at Liverpool, were abolished and transferred to General clearing. From 1 July 1969 all figures are worked on a 5 day week.

(2) Average of Wednesdays. Includes Bank of England notes held by the Scottish and Northern Ireland Banks as cover for their note issues in excess of the authorised circulation.

(3) Months: average of Saturdays in the consecutive four-week periods as published in *The London Gazette* or in *The Belfast Gazette*, with as close a correspondence as possible to the calendar months. Years: average of the thirteen published figures.

(4) Excluding coin in the Bank of England, Issue Department.

(5) Total notes and coin outstanding, less notes and coin held by the Bank of England, Banking Department, and by the London clearing banks, Scottish banks and Northern Ireland banks.

⁽¹⁾ The annual figures are averages of the figures for February, May, August and November.⁽²⁾ Included in Other manufacturing in Northern Ireland.⁽³⁾ The February 1968 figures are affected by the revaluation of foreign currency advances after 18 November 1967, and by the inclusion of several new contributors. Together, these accounted for some £260 million of the increase over the quarter in total advances (U.K. residents+£60 million and overseas residents+£200 million).

(¹) Derived from yield-maturity curves fitted by computer; an outline of the method used was given in the *Bank of England Quarterly Bulletin* for March 1967. Taxes are ignored. The yearly figures are averages of end month yields. The monthly figures are averages of Wednesdays.

(²) From January 1963 stocks with coupons below 4 per cent were omitted from the calculations and from January 1966 the limit was 5 per cent. The break in January 1966 causes a drop of 0.06 per cent in the short-dated series but does not affect the medium or long-dated series.

(³) Average of working days, based on the mean of the middle opening and middle closing prices each day, excluding gross accrued interest; tax is ignored.

(⁴) Averages of daily figures calculated from middle market closing prices.

(⁵) Gross redemption yields of 15 stocks so combined as to give a yield average for a constant 20-year term.

(¹) The figures represent the average earnings, including bonus, overtime, etc., and before deduction of income tax or insurance contributions, in one week in the months indicated. Administrative and clerical workers and other salaried persons have been excluded. Certain qualifications are given in a full account of the enquiry relating to April 1967, published in the *Ministry of Labour Gazette* for August 1967.

(²) From and including October 1967 includes (a) dock workers previously on daily or half-daily engagements and (b) postmen.

(³) This index relates only to the industries covered by the earnings enquiry. It should not be confused with the figures in Table 158 which cover all industries.

March ...												

(1) This index is compiled from the results of a monthly enquiry into total wage and salary earnings. The index has been revised and a full description is given in the *Ministry of Labour Gazette* for March 1967.

(2) The industries included in the enquiry are manufacturing, agriculture, mining, construction, gas, electricity, water, transport and communication and certain miscellaneous services. The coverage of the returns is virtually complete in gas, electricity, coalmining and rail transport. In the remaining sectors, the index is based on returns from a sample of about 7,500 firms having about 5½ million employees. In all, the returns show the earnings of about 60 per cent of the total number of employees in the industries concerned.

(²) England and Wales only. (⁴) Except sea transport and postal services. The indices from October 1966 include British Road Services. (⁵) Consisting of laundries and dry cleaning, motor repairers and garages and the repair of boots and shoes. (⁶) The epidemic of foot and mouth disease prevented visits by Ministry of Agriculture Wages Inspectors to farms in infected and adjacent areas. For this reason there is insufficient information to enable an accurate index for Agriculture to be calculated for this month but the best possible estimate has been used in the compilation of the index for all Industries and Services. (⁷) Provisional.

Source: Department of Employment and Productivity

Note: There are fluctuations from month to month due to such factors as bonus payments, seasonal variations in hours worked, loss of overtime pay during holidays, etc. Seasonally adjusted figures for all industries covered are given in the second column of the table. Although the seasonally adjusted figures have been revised and are now based on six years data they cannot be regarded as precise. It is not yet possible to produce reliable seasonal adjustments for the individual industries.

⁽¹⁾ The figures are based upon changes in basic rates of wages or minimum entitlements and reductions in normal weekly hours, which are normally determined by national collective agreements or statutory wages regulation orders. The information relates to the end of the month and, where necessary, the figures may be revised to take account of any changes having retrospective effect or reported belatedly. A brief note on the method of compilation of the figures is given in the current issue of the *Employment and Productivity Gazette*.

⁽²⁾ In general, males under 21 and females under 18 years of age.

⁽³⁾ The term 'Manufacturing industries' covers all industries included in Orders III-XIX of the *Standard Industrial Classification, 1968*.

(1) The figures relate to changes in basic full-time weekly rates of wages or minimum entitlements and do not reflect reductions in normal weekly hours without loss of pay or variations in actual earnings arising from such factors as overtime or lost time. The changes included are those determined by national collective agreements or by statutory wages councils or boards.

(2) The monthly totals in the columns headed 'Increase' and 'Decrease' relate to the number of workpeople affected by changes and the corresponding gross amounts. Workpeople affected by two or more changes are counted only once in the annual totals which relate to the number having increases only or for whom increases exceeded decreases, the number having decreases only or for whom decreases exceeded increases, and the corresponding net amounts; the column headed 'Net increase,' is therefore the overall net increase for the year.

(3) The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the workpeople covered by the statistics, for a full ordinary week's work at basic rates of wages at the end of any one year exceeds that for the corresponding week of the preceding year by the amount stated. The average weekly wages paid during any one year will not, however, exceed those paid during the preceding year by this sum, as the actual changes will have taken place at various dates during the year.

(¹) The Cost of Living Advisory Committee recommended in 1962 that until a satisfactory index series based on actual prices became available half the expenditure on meals out should continue to be allocated to the food group and the other half spread proportionately over all groups, including the food group. The index for meals out for 16 January 1968 implicit in this recommendation was 121.4. Since January 1968 an index series based on actual prices has been available and indices in this series have been linked with the implicit index for meals out for 16 January 1968, to obtain indices for meals out with 16 January 1962 taken as 100.

(²) These are the weights which would have been used in 1968 if expenditure on meals out had been treated as in previous years (see footnote(¹)). The weights actually used are given in the following line.

(1) Based on manufacturers' list prices.

(2) The market-price series are based on prices before the addition of subsidies paid to producers under the Cereals Deficiency Payments Scheme and Fatstock Guarantee Scheme.

(3) The gross-price series for wheat, cattle and pigs are based on prices after the addition of subsidies paid to producers; those for milk and eggs on prices paid to producers by the marketing boards for these commodities; and that for potatoes on producer prices, sometimes 'supported' by the Potato Marketing Board.

(4) Figures to June 1969 have been adjusted to final deficiency payments.

(5) Maincrop potatoes only.

(6) Based on guaranteed minimum prices to producers at packing station until March 1966, then on B.E.M.B. prices to producers under the Egg Contract Schemes.

(7) Based on net prices to farmers after deduction of subsidy.

(8) Provisional.

(1) Daily mean air temperature at sea-level.

(2) To convert °Centigrade into °Fahrenheit: multiply by 9, divide by 5, and add 32.

°Fahrenheit into °Centigrade: subtract 32, multiply by 5, and divide by 9.

(3) 1 inch = 25.400 millimetres.

1 millimetre = 0.0394 inches.

Do you know the latest trends in your industry?

To be up to date you need the Business Monitor Production Series

Up-to-date statistics of the output or deliveries of a wide range of industries that are collected by the Board of Trade and the Ministry of Technology are published regularly in the Business Monitor Production Series.

Each Monitor contains the latest figure of output, often with considerable detail of individual products, with a run of past figures, and some include additional information such as figures of materials used and stocks. The Monitors are the primary, and in many cases the only, source of the statistics they contain.

They are thus essential for keeping abreast of trends in an industry's activity, and in the output of its products. Firms can see how their own output compares with that of their industry as a whole, and which groups of products are expanding and providing market opportunities. They can also, in many cases, see what has been happening to competing products and follow the experience of industries that supply them or which they supply.

As an aid to more effective planning, and marketing, the information in the Business Monitor Production Series can be invaluable. Many firms already find that this is so. Whether your firm is large or small, you need the Business Monitor to keep you in touch with the trends in your industry.

Business Monitors are obtainable by annual subscription at £25 a complete set, or £1 a year for each title published monthly, or 7s. 6d. for each title published quarterly. Reduced rates are also available for bulk orders of 25 or more copies of individual titles.

Titles in the Business Monitor Production Series are:

Chemicals, etc.		P 28 Refrigerating Machinery	(Q)	P 15 Lace	(Q)
P 19 Colours	(Q)	P 12 Rotating Electrical Machinery	(Q)	P 14 Linen	(Q)
P 66 Organic Chemicals	(Q)	P 29 Scientific and Industrial Instruments and Apparatus	(Q)	P 10 Elastic Goods and Narrow Fabrics	(Q)
